TOP 10 Hybrid Integration Solution Providers - 2018

The path to an integrated work ecosystem seems cloudy to most. All double entendre aside however, hybrid integrations mark the pinnacle of what enterprises want in their pursuit of a functional cloud infrastructure. To support their businesses, companies look towards incorporating pervasive strategies that will allow them to tap into the potential of their existing on-premise investments, mobile devices, embedded hardware and the more recent smart devices and IoT. This transition requires that the strategy be flexible, open to tailoring and capable of including upgrades on an incremental scale.

An evolution of the pervasive faculties is required, to follow from an Ad Hoc system, to an adaptive one, eventually culminating in a self service model, wherein any functionalities required by the enterprise in the future will be addressable by their own team, seeking external help, only when required. A growing number of SaaS applications are requiring swift integrations and a need for fast, decentralized, platform based IT models.

The purview for consideration is plain and Cloud Tech Insights is elated to present the Top 10 Hybrid Integration Solution Providers - 2018, to symptomatically isolate and target the unique elements of the hybrid integration landscape.

Company:
Innovations

Description:
Innovations is a software application development and enterprise-based solution company

Key Person:
Andi Chaudhuri
Founder & Director

Innovations Crafting Client-centric Cloud Solutions

Today, cloud-native solutions and processes are imperatives to transform an enterprise into a digital entity and optimize productivity. However, standardized cloud solutions fail to address the industry-specific requirements of organizations and hence prove to be irreverent in helping them realize any productivity gains. Also, many of the organizations are reluctant to leave behind their legacy systems and adopt a complete cloud environment fearing data reliability and security issues. Here Palo Alto, CA-based Innovations emerges as a white knight that seamlessly connects data, conventional processes and system to cloud and facilitates hybrid integration to catalyze digital transformation. “We are partners in business success and IT backbone for enterprises in their journey towards efficient business operations,” says Andi Chaudhuri, founder and director, Innovations.

Andi Chaudhuri

“We prepare energy, finance, retail, and healthcare companies to tap the power of cloud and data,” states Andi Chaudhuri, Founder and Director, Innovations. For instance, the company enables energy companies to ascertain the place for deploying oil rigs, anticipate probable oil spill and restrain it, and prevent production downtime in their existing facilities. Furthermore, manufacturing and supply chain management companies can utilize Innovations’ cloud and analytics services to improve the production process and inventory management.

Data mining and analysis, and cloud migration are key constituents in hybrid integrations, but Innovations also acknowledges user-friendliness of

applications. The company develops user-friendly solutions that would assist users to adopt and utilize tools immediately. Innovations also focus its efforts on creating solutions that would simplify the usage of IT infrastructure.

Not only IT infrastructure but also workforce management is a simplified task due to Innovations’ solution that helps people monitoring and management in real-time. The solution helps HR department to calibrate the employee performance based on data. While Innovations continues to develop and deploy solutions as a part of hybrid integrations, it has crafted a solution to solve the operational challenge for San Diego State University. The client sought a sophisticated and large-scale application that would analyze air pollution data. Innovations developed the backend, infrastructure, and architecture and provided data visualization tools for determining pollution within a 5-mile radius or 10-mile radius from a particular location. Eventually, the client could easily harness air pollution data, analyze it on numerous parameters, and take the right action.

Currently, Innovations is focused on underpinning operations of companies that never had IT, partner. Partnership with clients helps the company to understand the market needs and develop a business strategy for expansion. Innovations look forward to helping government agencies, energy companies in unlocking the data trove and harnessing the critical information. In a nut shell, the company wants to be a dominant force in cloud services arena. **CT**

**We are partners in business success
 and IT backbone for enterprises
 in their journey towards efficient
 business operations**”

Chaudhuri shares how challenges are distinct for varied industries and his venture solves a gamut of problems. The firm recognizes operational and business needs of their clients and transforms their existing antiquated systems and dysfunctional frameworks through cloud-based services and solutions. The firm facilitates migration, integration and workload management to the cloud and executes cloud orchestration. With its native cloud solutions, the company eliminates reliance on legacy systems, accelerates processing data mined from clients’ existing systems, and adds efficiency to internal processes at a fractional cost and time. The mined data plays a crucial role in gauging customer demand, formulating market strategies, and accelerating the business decision-making process.

TOP 10 HYBRID INTEGRATION SOLUTION PROVIDERS - 2018

Company	Management	Description
Amazon Web Services Seattle/Washington aws.amazon.com	Andy Jassy CEO	AWS is an infrastructure platform that offers cloud computing services to businesses
antsle San Diego, CA antsle.com	Bernie Blume Co-Founder & CEO Johannes Dietzel Co-Founder & Analyst	antsle is a full-stack private cloud server solution for big and small companies looking to enter the exciting world of the Private Cloud while providing security and scalability
Concerto Cloud Services Tampa, FL concertocloud.com	Steve Terp President	Multi-Cloud Management, Application Expertise, and Cloud Consulting Services Tailored to Fit every Business need
DigitalOcean New York City, New York digitalocean.com	Ben Uretsky Co-Founder & CEO	DigitalOcean is a cloud infrastructure provider that provides virtual servers for software developers
Innominds San Jose, CA innominds.com	Navdeep Singh VP, Cloud & Product Engineering Divakar Tantravahi CEO, & Chairman, Sai Chintala President, Quality Engineering & DevOps	Innominds simplifies digital transformation journey for companies through end-to-end technology solutions and hosting services
Innovations Palo Alto, CA whitecodelabs.com	Andi Chaudhuri Founder & Director	Innovations is a software application development and enterprise-based solution company
Microsoft Redmond, Washington microsoft.com	Satya Nadella CEO	Microsoft develops, manufactures, licenses, supports and sells computer software, consumer electronics, personal computers and laptops
Navisite Andover/Massachusetts navisite.com	Sumeet Sabharwal General Manager	NaviSite provides managed cloud, managed application, managed messaging and enterprise hosting services for enterprises
Rackspace Windcrest/Texas rackspace.com	Joe Eazor CEO	Rackspace is an open cloud company that specialises in public, platform, hybrid and Email hosting and dedicated and private cloud services
RightScale Santa Barbara, CA rightscale.com	Michael Crandell Co-Founder & CEO	RightScale offers Software as a Service based cloud computing management solution for managing cloud infrastructure across multiple IaaS providers
